RE: Support for Evolutionary Energy Solutions CalSEED Grant Application

Dear Grant Manager:

On behalf of Cleantech San Diego, please accept this letter as one of support for the application submitted by Evolutionary Energy Solutions (EES) for a CalSEED grant.

EES has been accepted into the San Diego Regional Energy Innovation Cluster program and is an energy efficiency firm specializing in industry best practices for chiller and variable frequency drive optimization. Their project team is comprised of energy professionals with over 60 years of experience in facility energy management, central plants, and chiller plants.

Cleantech San Diego is a nonprofit business organization that positions the greater San Diego region as a global leader in the cleantech economy. We support the cleantech industry by fostering collaborations across the private-public-academic landscape, leading advocacy efforts to promote cleantech priorities, and encouraging investment in the San Diego region.

With the assistance of CalSEED funding, EES will be able to further integrate the knowledge and experience they are gaining through the operational performance testing they currently have underway. Funding will also enable EES to develop additional critical software changes to provide a more robust and effective technology and create an operational manual and detailed technical installation guideline.

Thank you for your consideration. If you have any questions about our support, please don't hesitate to contact me.

Sincerely,

A handwritten signature in black ink that reads "Jason Anderson". The signature is fluid and cursive.

Jason Anderson
