**Re: Commitment for City of Chula Vista's Advanced Microgrids Proposal**

Dear California Energy Commission EPIC Program:

**MISSION:**

To accelerate  
clean technology  
innovation and  
adoption of sustainable  
business practices  
for the benefit of  
the economy and  
the environment

On behalf of Cleantech San Diego, I am pleased to provide this Letter of Commitment for the development of an Advanced Microgrid at the City of Chula Vista's Civic Center. We understand that the City of Chula Vista is proposing this concept in partnership with a strong, experienced project team, in response to GFO-13-702: Demonstrate Business Case for Advanced Microgrids in Support of California's Energy and GHG Policies.

Should the City of Chula Vista's proposal be selected for award by the CEC, Cleantech San Diego will participate on the Advisory Committee formed by the City of Chula Vista. Participation on this Committee will involve a series of quarterly committee meetings in which representatives from Cleantech San Diego will gather with other stakeholders to review the Advanced Microgrid concept proposed by the project team and advise on ways to improve the concept, from project kickoff through completion of the final deliverables.

Cleantech San Diego is an active participant in the advanced energy industry in California, and thus has a deep interest in advising on the Advanced Microgrid concept to ensure it incorporates innovative technologies, planning and permitting approaches, and finance/business models. We believe that the industry would strongly benefit from this proposed Advanced Microgrid concept at the Civic Center in Chula Vista, because it will be a significant step toward the establishment of a successful and replicable model for other communities across the state.

We strongly support the City of Chula Vista's grant application and look forward to collaborating on this important project.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Anderson".
