To Whom It May Concern:

MISSION:

To accelerate
clean technology
innovation and
adoption of sustainable
business practices
for the benefit of
the economy and
the environment

On behalf of Cleantech San Diego, please accept this letter of support for Icarus RT, Inc. in their application for a CalSEED grant. We have become well acquainted with Icarus since July 2017, when they were accepted into our San Diego Regional Energy Innovation Network (SDREIN) incubator program. Like CalSEED, SDREIN is funded by the California Energy Commission's Electric Program Investment Charge initiative and is designed to help accelerate the market adoption of emerging electric energy technologies.

Cleantech San Diego is a member-based trade organization that works to position the San Diego region as a global leader in the clean energy and clean technology economy. Our members include renewable energy and energy storage developers who are well positioned to support the increase in distributed energy storage projects in the San Diego region by collaborating with startups to pilot their technologies.

Icarus RT has developed a snap-on technology that boosts the power output of solar PV panels by cooling the panels, capturing the heat that would otherwise be lost, and using the collected heat to generate and store additional power. Icarus RT's technology could play an important role in bringing cost-effective solar power and energy storage to California's energy mix. So far, we have been impressed by the advanced engineering and development work that a company the size and stage of Icarus has been able to carry out with so few resources.

In order to carry out the validation of their solar boosting technology and eventually produce a minimum valuable product, Icarus RT will require the critical funding that CalSEED is able to provide.

Thank you in advance for your consideration.

Sincerely,

A handwritten signature in black ink, appearing to read "Jason Anderson". The signature is fluid and cursive, with a long horizontal stroke at the end.

Jason Anderson
President and CEO
